

HVACs and CleanRoom Air Equipments Services

Validation & Calibration Services

Design Clean Air Rooms and BSL-2 Labs

Greetings from
Sci-Fi SeBeX Pvt. Ltd.

**“To Achieve Customer Satisfaction
by providing Good Quality Service
and the Applicable Requirements.”**

Sci-Fi SeBeX Private Limited has grown steadily at a satisfactory level providing our customers High Quality Services that complies with the statutory requirements. Delivering the highest-quality products and services is our target.

Our journey is continuous and conscious effort to improve ourselves. In our effort towards becoming an internationally recognized service provider, we make sure you get a complete array of technologies, capacities, manufacturing capabilities, infrastructure and human assets all under one roof.

We specialize in Validation & Calibration Service to comply with Pharmaceuticals, Biopharmaceuticals, Chemical Industries, Biotechnology, Microbiology, Health Care Development & Research Centre Regulation and also IQ/OQ/PQ documentation.

OUR VISION

- To create an effective service, customer satisfaction towards the kind of services provided by us to the customers.
- To foster high quality of new invention and technology.
- To achieve the continual improvement in all our activities and services.
- To take the challenges of service cost in day today market and fulfill customer needs and requirements.

Our Quality Standards

Our instruments used while Validations and Calibrations are timely tested and calibrated according to the latest referred standards. We are in process of NABL Accreditation and always follow NABH guidelines.

Quality Standards for Validation Services

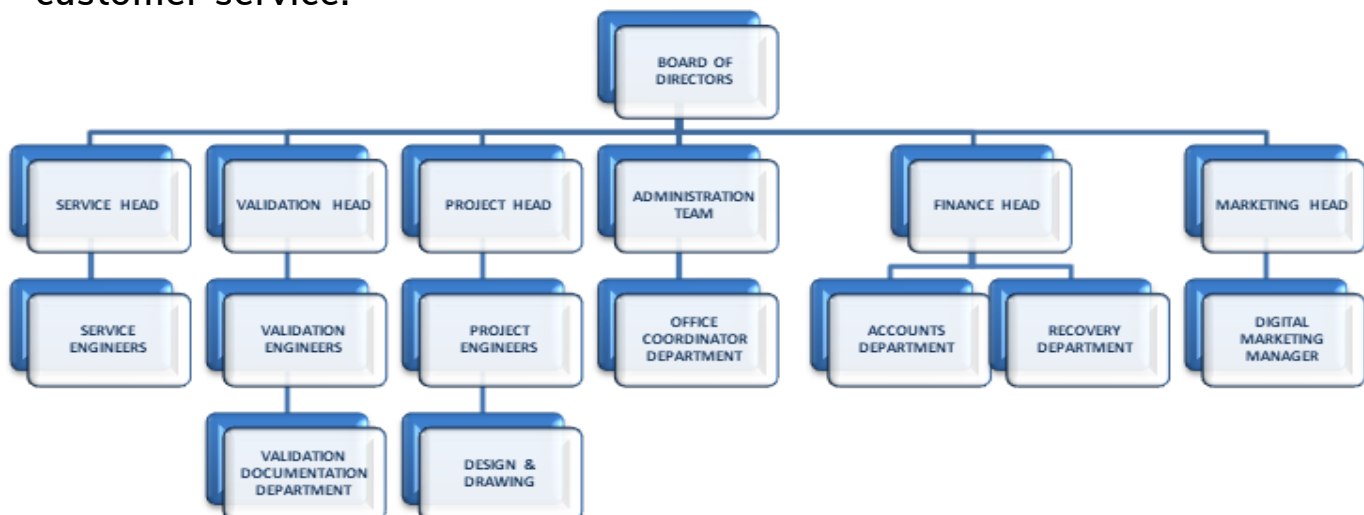

- ISO 14644-1,2,3
- GMP/ ICH, EU-GMP
- WHO TRS 937,961
- MCA & US FDA requirements

Quality Standards for Calibration Services

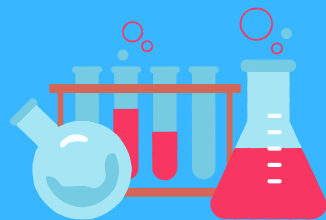

- BIS
- CG-Euromet
- DKD Guidelines
- IOSA 17025 and ISO 9001

Who we are

Sci-Fi SeBex have well trained experienced & professionally qualified colleagues. We have an excellent team of Service and Validation Engineers for Refrigeration System, Electronics Equipment, Calibration and Validation etc and also a professional team for Validation Reports and Documentations. We have more than 30 Service and Validation Engineers to deliver excellent customer service.

PRODUCTS & SERVICES

Pharmaceuticals and Industrial Equipments

We supply quality products and also provide AMC, CMCs, Validation and Calibration Services.

- Biosafety Cabinets
- Laminar Air Flows
- Ovens
- BOD Incubators
- CO2 Incubators
- Shakers
- Freezers, Deep Freezers,
- Ultra low -80 Deep Freezers
- Water Baths, Dry Baths
- Down Flow booths
- Autoclaves, Passbox
- Fume hoods

Repair Service

- Repair Service for all types of Pharmaceuticals, Biopharmaceuticals, Hospitals, Laboratories and Industrial equipments.
- Repair / Replacement of all types of controllers like PID and PLC controllers, etc
- Control System for Biosafety, Laminar Air Flow, Ovens, Autoclave, Incubator, etc
- Clean Room HVAC (Area Validations Systems and all related products.

AMC/CMC & Other Services of Equipment

- All Annual Maintenance Contracts. (Both Comprehensive as well as Non Comprehensive)
- Dismantling, Re – Installation and Up gradation
- Spare Parts (Repair / Replacement of Spare Parts)
- IQ, OQ, PQ Documents
- Design/Execute Projects for AHUs/HVACs
- Design HVAC Duct Layout
- Exhaust system for STP (Sewage Treatment Plant)
- Design and execution of molecular BSL II & BSL III Facility
- Pressure Module, Decon System, Ceiling Suspension Units

VALIDATION & CALIBRATION SERVICES

What is Validation? Why should be Validate?

Validation is confirmation by examination and provision of objective evidence that the particular requirements for a specified intended use are fulfilled. Establishing documented evidence which provides a high degree of assurance that a specific process will consistently produce a product meeting its pre-determined specifications and quality characteristics.

Quality, Safety and Effectiveness must be designed and built in to the product, quality cannot be inspected or tested in the finished products and each step of the manufacturing process must be controlled to maximize the probability that the finished product meets all quality and design specifications.

Validation allows us to focus on our everyday business operations of making and selling quality products that also comply with regulatory requirements.

What We Validate?

- Pharmaceutical manufacturing/ Biopharmaceuticals /Compounding Facilities
- Clean room HVAC (Area Validations)
- Hospital (Operation Theatres)
- Sterile supply departments
- Biological Safety Cabinets, Deep Freezers, Incubators, Autoclaves
- Laminar Flow Hoods, Compounding Aseptic Isolators, Fume Hoods etc.
- Any area where clean air supply is critical

Under Validation we conduct tests as follows:

- Air Velocity Test
- PAO Filter Integrity Test
- Non-Viable Particle Count Test
- Recovery Test
- Smoke Pattern Test
- Sound Level Measurement
- Air Flow Pattern Test
- Differential Pattern Test

Under Calibration we conduct work as follows:

- Temperature/ Relative Humidity Sensors, Controllers, Transmitters
- RPM, Vacuum Gauge, Pressure Calibration
- All types of Sensors and Transmitters
- Flow meters and Pipettes

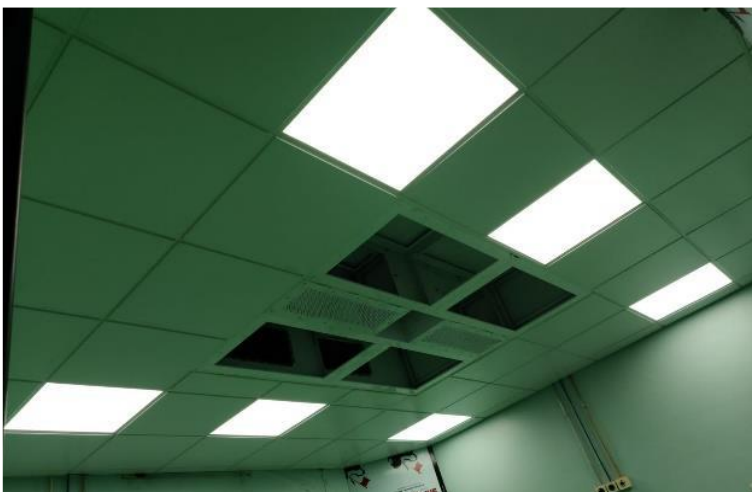

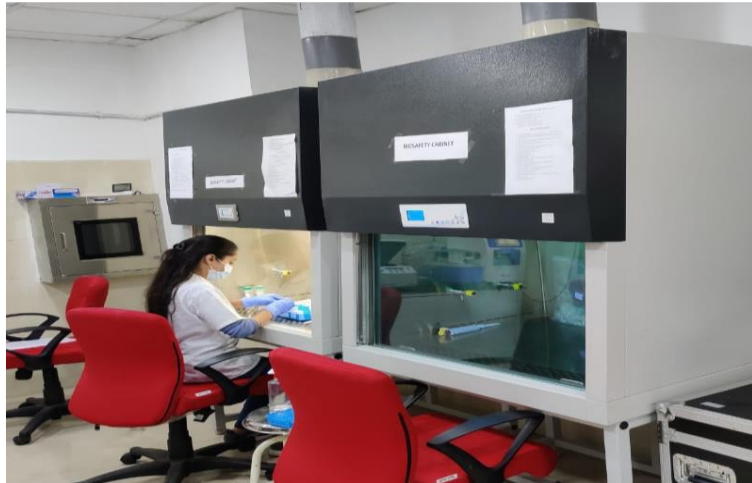

DESIGN & EXECUTE CLEAN AIR ROOMS AND BSL2 LABS

- Design HVAC Duct Layout. Design and execution of molecular
- BSL II & BSL III Facility.
- Pressure Module; Decon System, Ceiling Suspension Unit.
- We Design all types of labs and room as per client requirement.
